- IC - today Dom Creamer email given additional 50 from London - total 100

- others are leaving today - going to put ~~another~~ more on nights - in regards to hot teams will give you 15 back but you have to give 15 investigators from somewhere else - might need IC support for this.

- more on nights might not happen tonight but afternoons can go until 0200 until it calms down.

IC new radios for OPP are in OPS does not have enough radios only have 200 - IC will have to use RCMP radios downtown.

Groulx if you go ahead with teams w/ no OPS we can do that but need a senior officer for team lead

Groulx - who picked the people for detention? Steve Plummer pulled to go to detention but need him to run platoon? IC not sure will have to make enquiries with Levesque.

1122 -

Taylor - would like to get the daily briefings to be put into a secure format w/ a QR code so everyone can have access to all briefing info on their phones
OPP info a lot of the OPP did not have phones or were sharing phones.

1124

OPP they can be taking photos of briefing info rules of engagement, authorities arrest process and all briefing info
JC will ensure all the briefing info is being disseminated. OPP would the ~~text~~ of a hyperlink work? JC so much information they are inundated. JF if it is open to other agencies it is open to the world in a QR code form or hyperlink. The only solution is email the right command structure for dissemination.

OPP is will only be the authorities and justifications - not any confidential information. - Brad Taylor - OPP to check to see what digitized options are avail
JF can do mail merge to a work phone if we know the provider - possibly to OPP team leads who have OPP phones
JF - ^{OPP} staffing sheets have cell phones no emails -

OPP - any intelligence do not send just the authorities.

OPP possibly status update, objectives and authorities sent through
